

FROM KNOWLEDGE TO ACTION

NEW TOOLS, LEARNING OPPORTUNITIES AND THE SDGS UNIVERSITY KNOWLEDGE HUB

As #edu4sdgs enters its final month, the project is bringing together the knowledge, tools and experiences developed over the past three years.

From webinars connecting different perspectives on sustainability to interactive scenarios, educational games and new learning pathways, our focus remains the same: helping students, educators, university staff and other changemakers move from understanding the Sustainable Development Goals to taking meaningful action.

In this issue, discover our recent webinar series, upcoming opportunities to join the conversation, new tools for learning through experience, and the launch of the SDGs University Knowledge Hub.

The 3rd Social Sector as a tool for social transformation for achieving the SDGs

Why the 3rd Sector is essential to the welfare state:

a. Proximity to social challenges

- Works directly with vulnerable communities.
- Understands needs better than institutions from observation and inclusion in social dynamics

b. Practical expertise

- Experience in housing, migration, gender equality, health, inclusion, climate, etc. From the source

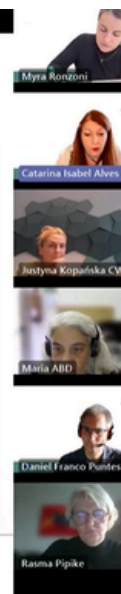

c. Innovation in social responses

- Pilot initiatives that governments later adopt.
- Create new models of care, participation, and sustainability.

d. Advocacy

- Push for policies aligned with SDGs.
- Give visibility to invisible populations.

#edu4sdgs

OUR EDU4SDGS WEBINAR SERIES

Over the past months, the [#edu4sdgs webinar series](#) has brought together different perspectives on how higher education can contribute to sustainable development.

The 3rd Sector, the SDGs and the University, hosted by UAB and ABD, explored how universities and NGOs can collaborate for the SDGs. From Awareness to Action: EQ in the SDG Framework, hosted by Team Coaching, examined how emotional intelligence can strengthen sustainable action. New Perspective on SDGs, hosted by RTU, brought together student and business perspectives on SDG education, sustainability, and the skills needed for future careers.

SDGs University Knowledge Hub, hosted by TUL, presented the project's digital platform and learning resources. Micro-credentials for the SDGs, hosted by UAB and ACEEU, explored how flexible learning and recognition can support sustainability competences.

Finally, Measuring the Performance of Universities Towards the SDGs, hosted by ACEEU and TUL, examined how rankings, accreditation and institutional assessment can help universities understand and strengthen their contribution to the SDGs.

THE EDU4SDG KNOWLEDGE HUB IS HERE!

A major #edu4sdgs milestone has arrived: the SDGs University Knowledge Hub is now open to learners worldwide.

Designed as a gateway to learning, reflection and action, the Hub brings the project's educational resources together in one online environment. It connects knowledge about the Sustainable Development Goals with emotional intelligence and opportunities for flexible learning.

EXPLORE THE RESOURCE LIBRARY

Discover publications, reports, articles, videos and other materials related to sustainability, the SDGs and emotional intelligence.

FOLLOW THE LEARNING PATHWAYS

Take structured learning journeys designed for different levels of knowledge and different types of learners.

EARN DIGITAL CREDENTIAL

Complete learning pathways and gain recognition for the competences and knowledge developed along the way.

Meet our Agents of Change!

SUSTAINABILITY MISSION LAB

22 MISSIONS. COUNTLESS WAYS TO ACT.

How do we prepare people to respond to sustainability challenges that rarely have one simple answer?

The Sustainability Mission Lab brings sustainability and emotional intelligence together through 22 practical missions. Participants are invited to engage with situations and challenges connected to the SDGs, reflect on different perspectives and explore how their choices, emotions and actions can contribute to positive change. The scenarios were developed as another practical way to move sustainability education beyond theory.

They encourage learners not simply to ask “What do I know about the SDGs?” but also: *What would I do? How would I respond? And how could my actions make a difference?*

EXPLORE MORE

The [Sustainability Mission Lab](#) is a flexible learning toolkit comprising 22 practical educational scenarios that connect the Sustainable Development Goals (SDGs) with emotional intelligence.

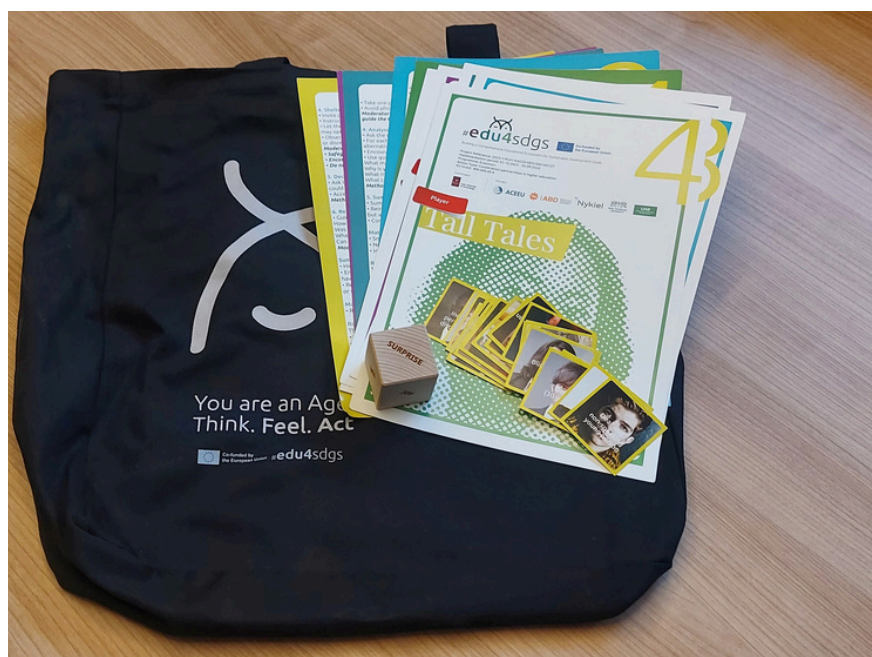

LEARNING THROUGH **PLAY**

THE #EDU4SDGS GAME

Sustainability can be learned in the classroom, but it can also be experienced in the places where we live, study and work.

The #edu4sdgs Game transforms the SDGs into an interactive learning experience combining sustainability, emotional intelligence and teamwork. During the Riga Summer School and the BIP in Łódź, participants explored a series of missions around the university campus, developing their awareness of the SDGs while strengthening leadership, collaboration and community-building skills.

Designed with flexibility in mind, the tool empowers moderators to build their own game experience by choosing from a range of scenarios and missions. With ready-to-use introductory materials and facilitation guidance, planning and delivering an engaging SDG-focused learning adventure has never been easier.

As #edu4sdgs enters its final phase, the project is bringing together the ideas, tools and learning experiences developed over the past three years. With the SDGs University Knowledge Hub now available, learners and educators can continue exploring sustainability through resources, scenarios, games and structured learning pathways.

The coming weeks will offer further opportunities to connect through our final webinars and project activities. We invite you to join us, explore the platform and discover how the #edu4sdgs resources can support sustainability learning in your own institution, classroom or community.

The project may be approaching its conclusion, but the ambition behind it remains: turning knowledge about the SDGs into meaningful learning, engagement and action.

More to come! Stay connected!
